

How an abscess in the Fallopian Tubes of Mrs. Hollinger was removed without a surgical operation.

"I had an abscess in my side in the fallopian tube (the fallopian tube is a connection of the ovaries). I suffered untold misery and was so weak I could scarcely get around. The sharp burning pain low down in my side was terrible. My physician said there was no help for me unless I would go to the hospital and be operated on. I thought before that I would try Lydia E. Pinkham's Vegetable Compound which, fortunately, I did, and it has made me a stout, healthy woman. My advice to all women who suffer with any kind of female trouble is to commence taking Lydia E. Pinkham's Vegetable Compound at once."—Mrs. I. A. HOLLINGER, Stillville, Ohio.—\$1000 profit if original of above letter proving genuineness cannot be produced.

It would seem by this statement that women would save time and much sickness if they would get Lydia E. Pinkham's Vegetable Compound at once, and also write to Mrs. Pinkham at Lynn, Mass., for special advice. It is free and always helps. No other person can give such helpful advice as Mrs. Pinkham to women who are sick.

WESTERN CANADA GRAIN CROWING. MIXED FARMING.

The Reason Why more wheat is grown in Western Canada in a few short months than elsewhere, is because vegetation grows in proportion to the amount of moisture. The more moisture there is in which grain will come to perfection, the better the crop. The climate of the West is the best. The area under crop in Western Canada, 1902, 1,037,330 Acres. Yield, 1902, 117,928,754 Bush. HOMESTEAD LANDS OF 160 ACRES FREE, the only charge for which is the cost of a building. Abundance of water and fuel, building material cheap, good grass for pasture and hay, a fertile soil, a sufficient rainfall, and a climate giving an extended and adequate season of growth.

RELICS OF DARKER TIMES.

Ignorance in Many Forms Still Works Mischiefs. All England has been indignant at the crime and at the insufficient punishment of a mother who punished her daughter brutally for a "bad habit." Almost every one can remember such an illustration of punishing children for being ill which occurred in his neighborhood or family during his childhood. The fact arouses the thought that the old-time punishments of the insane, of the aged, etc., are by no means past. To every oculist's office are frequently brought the pitiable victims of stupid school teachers who are still often punishing children for the astigmatism, myopia or hyperopia which has prevented them from seeing figures on the blackboard or from studying diligently, or from being as bright-minded as the teacher wishes. We know of one railway superintendent who punishes his men who are growing presbyopic by discharging them if they wear glasses. One wonders if the detestable superstition of the evil eye, and the horrible punishment inflicted on its supposed possessor, has not arisen because of strabismus.—American Medicine.

STATUS OF RUSSIAN WOMEN.

Peculiar State of Affairs in the Empire of the Czar. We think that Russian women are far behind American and English women in business and professional emancipation. Yet in St. Petersburg you can see one of the finest medical colleges for women in the world, and quite as many women doctors flourishing as in London.

The pictures one gets of Russian prison life from Tolstoy and George Kennan are terrible and revolting. But Russia has a model prison at Archangel, one of the finest in the world. Again, from Tolstoy and from Gorky one sees the peasants utterly without liberty, without hope. But every village has its "mir," or village council, where the advanced doctrines of local option and women suffrage are carried out, two things long fought for unsuccessfully in England.

Pearl Fishery Have Good Season. The pearl fishery season this year in the Persian gulf has been a most successful one, the divers having obtained more jewels than in the last two years. Nearly all the pearls were purchased by an Arab merchant named Sheikh Mohamed bin Abou Wahab of Darfur. All will be sent to the Bombay market, where they are expected to realize over £300,000.

"Look Tae the Fush." A certain Scotch laird recently invited an English friend to stay with him for some fishing. One day the Englishman, who was a novice at the sport, hooked a fine salmon, and, in his excitement, slipped and fell into the river. The keeper, seeing that he was no swimmer, hooked on to him with the gaff and was about to drag him ashore, when the laird called out, "What are ye about, Donal. Get haul' or the rod and look tae the fush. Ma friend can bide a wee, but the fush wiana!"—Forest and Stream.

HOOPER YOUNG CONFESSES.

And is Sentenced to Life Imprisonment for Murder of Mrs. Pulitzer. William Hooper Young, on trial in New York City for the murder of Mrs. Anna Pulitzer, pleaded guilty to murder in the second degree, and was sentenced to life imprisonment.

Justice Herlick explained that he had advised Young's counsel to change his plea, and so advised the district attorney to accept it, this action being taken because of the prisoner's mental condition. According to the report of the doctors, he was not insane in the legal aspect of insanity, but from a purely medical point of view, he is not sane.

The crime which Young has admitted was the murder of Mrs. Anna Pulitzer on September 14 last. Mrs. Pulitzer's body was found in a canal near Newark, N. J. Suspicion pointed to Young, and a search of his rooms revealed incriminating evidence. Young fled and was captured in Derby, Conn. Mrs. Pulitzer's body was badly mutilated by her murderer, there being twelve stab wounds. She was disemboweled. Young's trunk, in which were a bloody dagger and some of Mrs. Pulitzer's clothing, was located in the Chicago depot, he having sent it there by express just before he fled. Young's infatuation for the woman and his abnormal conditions are held to be responsible for the murder.

THE SMOOT PROTEST.

Consists of a Sixty-two-Page Pamphlet, Signed by Prominent Men.

The protest against the seating of Senator Smoot, which has been received by Senator Burrows, chairman of the committee on elections and privileges, has been carefully prepared in pamphlet form, and consists of sixty-two pages of printed matter. Quotations from sermons, manifestos, trials, newspaper interviews, etc., are made liberally, with frequent references to church books and church announcements. It is contended:

1. That the Mormon priesthood, according to the doctrines of that church, is vested with supreme authority in all things, temporal and spiritual.

2. That the first presidency and twelve apostles are supreme in the exercise and transmission of this authority.

3. That this body of men has not abandoned the principles and practice of political dictation, so also it has not abandoned belief in polygamy and polygamous cohabitation.

4. That this attitude of the first presidency and apostolate ever since the suspensory manifesto of 1890, is evidenced by their teachings since then.

5. That this body of officials, of whom Senator-elect Smoot is one, also practice or connive at and encourage the practice of polygamy and polygamous cohabitation, and those whom they have permitted to hold legislative office have, without protest or objection from them, sought to pass a law nullifying the enactments against polygamous cohabitation.

6. That the supreme authorities in the church, of whom Senator-elect Smoot is one, to-wit, the first presidency and twelve apostles, not only connive at violations of, but protect and honor the violators of the laws against polygamy and polygamous cohabitation.

The document is dated at Salt Lake City, January 26, and is signed by the following: W. M. Rader, P. L. Williams, E. B. Critchlow, E. V. Wilson, C. C. Goodwin, L. U. Colbath, W. A. NAILED MAN'S FOOT TO FLOOR.

Horrible Outrage Inflicted on a Pole in Pennsylvania.

Anton Merhoon, a Pole, of Pittsburg, Pa., suffered one of the most excruciating tortures ever allotted to man. For four hours he stood with one of his feet nailed to the floor. Then he underwent the pain of having the nail extracted that he might be released. Merhoon was employed as a laborer at the schoenberger mills, having arrived in this country recently. For some reason his countrymen disliked him. He says that this dislike is due to his having succeeded one of their most intimate friends at the mill. They allege that he took the place for less money. At any rate, they resolved to "get even" with him. Merhoon was working alone in a room. Suddenly the door was thrown open and his four countrymen entered. Merhoon says that they demanded that he give up his place at once and leave the city. This Merhoon refused to do. The four men then set upon him and beat him in a terrible manner. Then one of them picked up a hammer which was lying on the floor, secured a nail or small spike about four inches long, which was driven through the struggling man's right foot and into the floor. They then left, locking the door, the unfortunate man being alone for four hours before he was discovered in an almost dying condition.

Shot Pierced Heart.

John W. Pratt, a well known newspaper man and lawyer, committed suicide in Seattle during a fit of insanity. Mr. Pratt has been mentally unbalanced for about a year, and had never been morbid nor violent. Mrs. Pratt, hearing the report of a shotgun which her husband had taken to the bathroom, found the body. A charge of shot had pierced the heart. It was at first thought that Mr. Pratt's death was a result of an attack, but there is no longer doubt that it was suicide.

GIFT THAT MADE TROUBLE.

Unfortunate Meeting Probably Cause for Family Feud.

When the tall lady in the sealskin coat entered the car the short, jolly woman who was sitting near the end instantly became all smiles.

It was only a minute before they were hard at it, telling all about their Christmas gifts.

"Changing something?" said the tall one, motioning to a parcel the other held in her lap.

"Yes," was the reply; "something some one sent me, don't know who, and as I don't like it I am going to change it. Isn't it homely? I never wear black, anyway," and in a second she had the bundle opened and its contents exposed to the eyes of her companion.

The tall lady said never a word for a full moment. Then with a glance that would have frozen boiling water, she remarked, haughtily, "I sent that to you."

Millionaires Serve on Jury. With a view to raising the standard of jurors, Judge J. A. Evans of Pittsburg had the names of a number of wealthy men put in the wheel from which jurymen are drawn. Judge Evans declared that excuses would not avail, and hinted that the sheriff would be sent after those who fail to come to time.

Denunciation of Liquor Traffic.

Rev. D. J. O'Sullivan, a member of the Vermont state legislature, is the first Catholic priest ever elected to that body. Mr. O'Sullivan was invited to attend a dinner given by the anti-prohibitionists, but was unable to attend. He wrote a letter in which he said: "Personally I am not irrevocably wedded to any system of regulating the liquor traffic. I have never said one word against the prohibitory law, but I am heart sick of the sanctimonious hypocrisy, the lying, the private and public corruption and the whole train of evils connected with its enforcement."

High Authority on Art.

Sir John Charles Robinson, one of the highest living authorities on art, is 78. He was born at Nottingham, and there received his earliest education. He studied art in Paris and is an honorary member of nearly all the academies of fine arts in Europe. From 1852 to 1869 he was superintendent of art collections at the South Kensington museum and originated the system of loan collections whereby works of art are circulated through the provinces. From 1882 to 1891 he was surveyor of pictures to the crown.

BEAUTY AND PURITY

Ancient and Modern Ideas on the Subject. Time and Disease the Effacing Agents of Beauty. What Has Science Done to Restore the Lily and the Rose?

Socrates called beauty a short-lived tyranny, Plato a privilege of nature, Theocritus a delightful prejudice, Theophrastus a silent cheat, Carneades a solitary kingdom, Homer a glorious gift of nature, Ovid a favor of the gods. Aristotle affirmed that beauty was better than all the letters of recom-mendation in the world, and yet none of those distinguished authorities has left us even a hint of how beauty is to be perpetuated, or the ravages of age and disease defied. Time soon blends the lily and the rose into the pallor of age, disease dots the fair face with cutaneous disfigurements and crimson spots, the Roman rust with unsightly fleas, moth, if not rust, corrupts the ivory of eyes, teeth, and lips yet beautiful by defacing the complexion, and fills the sensitive soul with agony unexpressed.

If such be the unhappy condition of one afflicted with slight skin blemishes, what must be the feelings of those in whom torturing humors have for years run riot, covering the skin with scales and sores and changing the blood with poisonous elements to become a part of the system until death? It is vain to attempt to portray such suffering. Death in many cases might be considered a blessing. The blood and fluids seem to be impregnated with a fiery element which, when discharged through the pores upon the surface of the body, inflames and burns until, in his efforts for relief, the patient tears the skin with his nails, and not until the blood flows does sufficient relief come to cause him to desist.

Thus do complexion defects merge into torturing disease, and pained vanity give place to real suffering. A little wart on the nose or cheek grows to the all-devouring lupus, a patch of tetter on the palm of the hand or on the limbs suddenly envelops the body in its fiery embrace, a bruise on the leg expands into a gnawing ulcer, which reaches out its fangs to the sufferer's heart in every paroxysm of pain, a small sore in the neck multiplies into a dozen, which eat away the vitality, great pearl-like scales grow from little rash-like inflammations in such abundance as to pass credulity; and so on may we depict the sufferings to which poor human nature is subject, all of which involve great mental distress because of personal disfigurements.

If there were not another external disease known, eczema alone would be a sufficient infliction on mankind. It pervades all classes, and descends impartially through generations. While some are constantly enveloped in it, others have it confined to small patches in the ears, on the scalp, on the breast, on the palms of the hands, on the limbs, etc., but everywhere its distinctive feature is a small watery blister, which discharges an acrid fluid, causing heat, inflammation, and intense itching. Ring-worm, tetter, scalled head, dandruff, belong to this scaly and itching order of diseases. Psoriasis, our modern leprosy, with its mother-of-pearl scale, situated on a reddened base, which bleeds upon the removal of the scale, is to be dreaded and avoided, as of old. Impetigo, barber's itch, erysipelas, and a score of minor disorders make up in part the catalogue of external diseases of the skin. Thus far we have made no allusion to those afflictions which are manifestly impurities of the blood, viz.: swelling of the glands of the throat, ulcers on the neck and limbs, tumors, abscesses, and mercurial poisons, with loss of hair, because the whole list can be comprehended in the one word scrofula.

It is in the treatment of torturing, disfiguring humors and affections of the skin, scalp, and blood, with loss of hair, that the Cuticura remedies have achieved their greatest success. Original in composition, scientifically compounded, absolutely pure, unchangeable in any climate, always ready, and agreeable to the most delicate and sensitive, they present to young and old the most successful curative of modern times. This will be considered strong language by those acquainted with the character and obstinacy of blood and skin humors but it is justified by innumerable successes where all the remedies and methods in vogue have failed to cure, and, in many cases, to relieve, even.

The Cuticura treatment is at once agreeable, speedy, economical, and comprehensive. Baths the affected parts freely with hot water and Cuticura soap, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment to allay itching, irritation, and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning, and scaly humors, and points to a speedy, permanent, and economical cure of torturing, disfiguring humors, eczemas, rashes, and inflammations, from infancy to age, when all other remedies and the best physicians fail. The remedies constituting the Cuticura system will repay an individual scrutiny of their remarkable properties.

Cuticura Soap contains in a modified form the medicinal properties of Cuticura Ointment, the great skin cure and purest and sweetest of emollients, combined with the most delicate and refreshing of flower odors. It purifies and invigorates the pores of the skin, and imparts activity to the oil glands and tubes, thus furnishing an outlet for unwholesome matter, which if retained would cause pimples, blackheads, rashes, oily, mothy skin, and other complexional disfigurements, as well as scap affections and irritations, falling hair, and baby rashes. Its gentle and continuous action on the natural lubricators of the skin keeps the latter transparent, soft, flexible, and healthy. Hence its constant use, assisted by an occasional use of Cuticura Ointment, realizes the fairest complexion, the softest, whitest hands, and the most luxuriant, glossy hair within the domain of the most advanced scientific knowledge to supply.

Cuticura Ointment possesses, at the same time, the charm of satisfying the simple wants of the toilet of all ages, in caring for the skin, scalp, hair, and hands far more effectually, agreeably, and economically than the most expensive of toilet emollients, while free from every ingredient of a doubtful or dangerous character. Its "One Night Treatment of the Hands," or "Single Treatment of the Hair," or use after athletics, cycling, golf, tennis, riding, sparring, or any sport, each in connection with the use of Cuticura Soap, is sufficient evidence of this.

Of all remedies for the purification of the blood and circulating fluids, none approaches in specific medical action Cuticura Resolvent. It neutralizes and resolves away (hence its name) scrofulous, inherited, and other humors in the blood, which give rise to swellings of the glands, pains in the bones, and torturing, disfiguring eruptions of the skin and scalp, with loss of hair. Cuticura Resolvent extends its purifying influence by means of the pores to the surface of the skin, allaying irritation, inflammation, itching, and burning, and soothing and healing. Hence its success in the treatment of distressing humors of the skin, scalp, and blood, with loss of hair, which fail to be permanently cured by external remedies alone.

The grandest testimonial that can be offered Cuticura remedies is their world-wide sale, due to the personal recommendations of those who have used them. It is difficult to realize the mighty growth of the business done under this name. From a small beginning in the simplest form against prejudice and opposition, against monied hosts, countless rivals, and trade indifference, Cuticura remedies have become the greatest curatives of their time, and, in fact, of all time, for nowhere in the history of medicine is to be found another approaching them in popularity and sale. In every clime and with every people they have met with the same reception. The confines of the earth are the only limits to their growth. They have conquered the world.

To the test of popular judgment all things mundane must finally come. The civilized world has rendered its verdict in favor of Cuticura.
